*A Division of Mount Vernon Mills, Inc.*

## *About* RIEGEL

The Riegel Consumer Products Division of Mount Vernon Mills, Inc. has been making Worry-Free Textiles Since 1838. Our rich heritage and roots in manufacturing ensure that our customers receive both great quality and value. We lead the market in innovations ranging from first to market with new products, technical breakthroughs in fiber formation and color retention and global distribution capabilities. The Riegel name serves as both our division's name as well as a widely recognized brand in hospitality, linen supply, healthcare and retail sectors. Our name is synonymous with Quality as all industries we service know Riegel products both look great and last a long time. Our products are engineered to thrive in commercial laundering environments giving customers great value.

Our division's dual manufacturing and distribution facilities in South Carolina are complimented by other strategically placed distribution facilities in the United States providing quick shipments to our customers. The McCormick SC manufacturing facility features state of art cut and sew technology which translates to quick turnaround on custom-size requests and a critical back up to any import programs. These are many of the reasons that all major hotel brands feature Riegel products on their tables and in their rooms.

*Making Worry - Free Textiles Since 1838*

Riegel is only one of the six divisions that make up Mount Vernon Mills. Other divisions include our own transportation division (Smith & Waters), our own chemical division (which produces many of the finishes for our products in the US and overseas), a home furnishings division (LaFrance), a greige goods weaving division which produces our surgical towel fabrics (BrenTex) and last but not least - our Apparel I Fabrics Group (AFG). The AFG features a completely vertical operation - yarn formation/spinning, weaving, dyeing & finishing - in their Trion, GA facility. This mill produces over one million yards of denim a week and is the industry leader in Flame Resistant (FR) fabrics made to protect workers. Their "Mount Vernon FR - Wear it for Life" tagline encapsulates both the durability of the fabrics as well as the protective qualities they provide.

Mount Vernon Mills is one of the largest USA textile mills and employs over 3,000 people in over 15 locations throughout the country. World class facilities, equipment, products and people all reside under our umbrella and we welcome the opportunity to serve you.

#### *Triple Sheetting 101*

1. Cover the mattress with a fitted sheet or flat sheet and tuck on all sides
2. Add the second layer by placing the top hem of a flat sheet so it is even with the top of the mattress
3. Layer a lightweight blanket approximately 6" below the top of the mattress
4. Place a decorative top sheet over the blanket so the top hem is even with the top of the mattress
5. Fold both flat sheets down about 6" followed by an additional 6" fold to include the blanket
6. Finish the look by tucking everything beneath the foot of the mattress and tailor the sides, accessorize with cushions and bed runners for a fresh, modern flare
