the **cambro**®story

When William and Argyle Campbell first opened the doors at Cambro Manufacturing in 1951, their goal was to make a hospital meal tray of the highest quality possible. Named the Camtray®, it demonstrated that they were as committed to excellence in the food service industry as they were to the quality of their own products. As 2016 marked the company's 65th year of leadership in quality, innovation and customer service, today Cambro serves the world with the industry's most complete selection of products for widely diverse segments of the food service business.

The future is certain to bring great changes to our industry. Yet one thing that will remain a constant is Cambro's tradition of continually developing new products that help food service operators save time and money, increase sales, reduce labor and improve service. In the years ahead, guided by the commitment of its founders to innovation, quality, and value, Cambro Manufacturing will still be the leader in serving the food service industry and you, our valued customer.

HIGH DENSITY STORAGE FLOOR TRACK SYSTEM

Maximize storage capacity by creating storage aisles in all available space. This simple system is composed of stationary starter units anchored to a raised floor track system at both ends with high density mobile units installed in between. Easy to install track requires no drilling or gluing.

Increases Storage Capacity Up To
50%

High Density Mobile Units are available with factory assembled post kits, vented or solid shelves and high density casters and bumpers. Full track and extension kits ship complete with required hardware. Stationary Starter Units are required to anchor the system at both ends. Choose from a wide selection of sizes with 4 or 5 shelves to maximize storage space. (see Premium Series spec pages).

Active aisle of 30"– 36" provides easy access to all stored product.

Stationary Unit*

High Density Mobile Units

Stationary Unit

Raised Floor Track provides a smooth and level surface to easily roll mobile units. Raised track ensures dirt will not get trapped and is easy to clean. Aluminum track and stainless steel hardware are rust resistant.

*It is recommended to use a stationary unit for every 15' of track to further stabilize the system.

Grooved casters roll easily and securely on raised track.
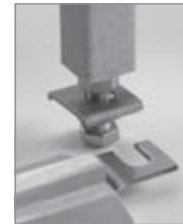

Raised track connects easily to the bottom of a stationary unit that works as a system anchor. No bolts, no glue or drilling into the floor are required. Easy and fast set up.

STATIONARY

WHY CHOOSE BASICS PLUS?

Just because the budget is tight and storage needs are less rigorous, it doesn't mean that shelving performance and storage efficiencies should be compromised. Basics Plus Series is made from the same high performing, strong composite material as Elements Series and has the same design features. It's lighter in weight and less in cost but still strong enough to handle light to medium storage demands.

New!

Holds full-size (1826) and half-size (1318) sheet pans.

End load design with no middle crossbar provides quick and easy access to rack contents.

Positioning ribs on ends help to keep sheet pans centered on rails.

Molded in ribs promote airflow for efficient cooling or thawing.

Choose from 3" or 1½" rail spacing.

ABOUT RAIL SPACING
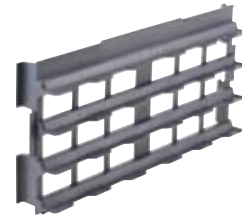

3" rails are most versatile. This "speed rack" style allows for quick loading and unloading. It also allows for maximum capacity per tray side to side.

1½" rails are best for high productivity or bakery applications for maximum holding capacity.
