ABOUT FISHER

Since 1936, Fisher Manufacturing has been dedicated to providing its customers with the most advanced commercial plumbing systems available. For three generations the Fisher Family has adhered to a strict dedication of consistent performance, product dependability and overall value. When you install Fisher... you've installed the best.

Fisher hardware is manufactured with a standardization of internal mechanisms. All chrome plating is triple plated -- copper, nickel, and chrome -- for durability. Every fixture we make is rigorously tested in both our modern in-house testing center, and in actual field situations under extreme conditions.

Every detail is thoroughly checked and re-checked. And, before we make our products available to you, they must pass each and every test. So you get proven performance...Guaranteed!

We invite you to explore our company, family of brass and stainless steel products, and technical support information for a more in-depth look at why Fisher Manufacturing is the world leader in commercial plumbing equipment and hardware specialties.

WARRANTIES

Fisher Manufacturing Company warrants its products and parts thereof (except as noted below) against defects in materials or workmanship for a period of one year after the date of original purchase. During this period Fisher Manufacturing Company will replace a defective product or part without charge to you, provided that the entire product is delivered to Fisher Manufacturing Company. All transportation and insurance charges for shipping the product to and from Fisher Manufacturing Company must be borne by you. Charges for transportation and insurance may, at the option of Fisher Manufacturing Company, be refunded depending upon our investigation of the warranty claim. This warranty does not cover external finish (except at date of original purchase) or labor costs not specifically authorized by Fisher Manufacturing Company.

Fisher Manufacturing Company warrants its STAINLESS STEEL products and parts thereof (except as noted below) against defects in materials or workmanship for a period of five years after the date of original purchase. During this period Fisher Manufacturing Company will replace a defective product or part without charge to you, provided that the entire product is delivered to Fisher Manufacturing Company. All transportation and insurance charges for shipping the product to and from Fisher Manufacturing Company must be borne by you. Charges for transportation and insurance may, at the option of Fisher Manufacturing Company, be refunded depending upon our investigation of the warranty claim. Gaskets, seat washers, "O" rings and other non stainless steel parts are warranted for one year. The external finish is warranted for the lifetime of the fixture. This warranty does not cover labor costs not specifically authorized by Fisher Manufacturing Company. This warranty excludes retractable hose reel units.

REFLECTIONS ON RESPONSIBILITY

Green Reserve

Fisher Manufacturing is located in the heart of the agriculture-rich, Central Valley of California. The facility is housed on 2.5 acres. One acre of this property has been permanently set aside as a nature area allowing grass, trees, and plants to grow, permitting rainwater to percolate back into the land and runoff recharging the local aquifer.

Reduced Waste

During the machining process of our brass components, no cutting oils are used to cool or lubricate parts and tools. Fisher's method eliminates the need to dispose of environmentally unfriendly chemicals, which can be harmful to the earth.

Recycling

Brass - Fisher uses over 200,000 lbs. of brass annually in the production of our products. Virtually all of this material comes from recycled brass in the form of ingots, castings, and finish component parts. Using recycled stock eliminates the need to mine virgin copper, zinc and other elements preserving precious natural resources.

Testing Water - Every single faucet Fisher manufactures is water-tested with recycled water using re-circulating pumps. This process reduces the demand for water and sewer services from the local system and conserves water reserves.

REFLECTIONS ON RESPONSIBILITY

Energy Conservation

Ultra Spray(TM) Pre-Rinse Spray Valve- An early leader in the of natural resources, Fisher Manufacturing developed the Ultra Spray(TM) Pre-Rinse Valve in 1985. While federal law now mandates a maximum 1.6 GPM requirement, Fisher brought this 1.15 GPM energy—saving valve to the industry over 20 years ago reducing water, heat and sewage usage.

Low flow aerators- To further reduce water consumption, Fisher also installs Low Flow Aerators on each manufactured faucet used for handwashing.

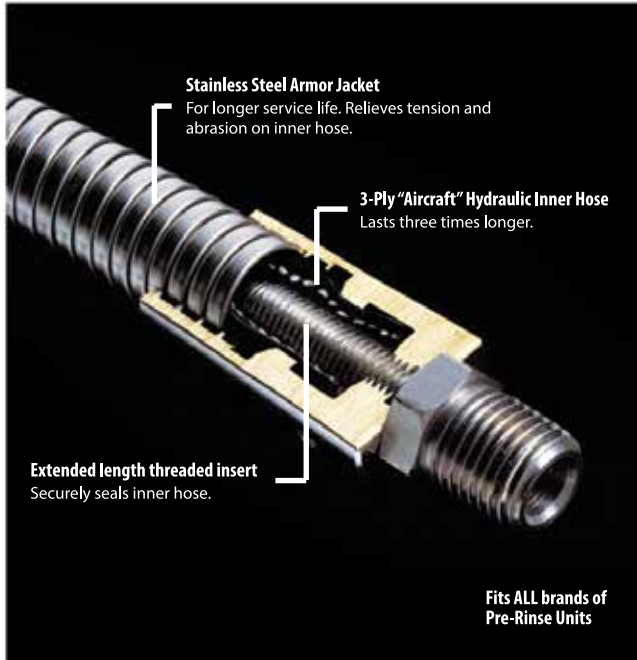

Contributions

Since 2004, Fisher Manufacturing has donated over \$250,000 of products and excess inventory to 'The Storehouse.' Additionally, Fisher has provided binders, folders, and other needed school materials to the students in our local Tulare Unified School District.

3/4" FAUCETS

Fisher has designed a line of 3/4, Pot Sink Faucets to save time on filling large pot sinks. The complete line of these timesaving faucets are shown as follows.

1. Stainless Steel Seats — guaranteed for the life of the faucet.
2. Standard Swiveling Seat Disks — pivot on stems so that there is no twisting against seats for longer seat washer life.
3. Stainless Steel "Self-Locking" Seat Disk Screws.
4. International Color Coded Handle Identification Buttons — hot (red) and cold (blue) for safety.
5. Industry Standard Seats and Gaskets — easily obtainable; no need to order special parts.
6. Choice of Handles — lever, cross, wrist.
7. Easy Turn" Stem — exceeds Americans with Disabilities Act (ADA) regulations.
8. Clearly Marked Right and Left Stems.
9. 1" Diameter Spout without Aerator — ensures full flow.
10. Full 3/4,, Seat Opening.
11. Dual "O" Ring Spout Collar — ensures positive seal.
12. ANSI/NSF 61, Section 9 Certified.

GLASS FILLERS

Fisher glass fillers feature high quality construction, great looks, and simplicity of design for long service life. They are available in your choice of models to meet virtually any water service installation and need.

- 1 Standardized Internal Gaskets/Washer — easily replaceable.
- 2 Replaceable Internal Parts
- 3 Simple, Balanced Mechanism — fewer internal parts for long service life.
- 4 Tamperproof Volume Control — perfect for self serve stations, avoids water waste, “over filling” of glasses.
- 5 Handles Both Paper & Glass Cups.
- 6 One Piece Molded Delrin™ Prong — eliminates rubber bumpers, won't mar or break glasses.
- 7 Easily Replaceable Filler Head — interchangeable with all major brands.
- 8 Stainless Steel Self Locking Seat Disk Screws.
- 9 Stainless Steel Stream Straightener.
- 10 ANSI/NSF 61, Section 9 Certified.

EZ INSTALL FISHER FAUCET

Simplifies replacement installation because there's NO need to remove the sink from the wall.

Replace ANY backsplash mount faucet in 4 EZ steps...

STEP 1 - Do NOT remove sink from wall. Locate connecting nuts.

STEP 2 - Remove old control valve by unthreading nut.

STEP 3 - Place new fitting. Thread in FISHER EZ-Install Adapter.

STEP 4 - Thread new FISHER control body onto EZ-Install Adapters and tighten.

THE FISHER EZ-INSTALL ADAPTER.

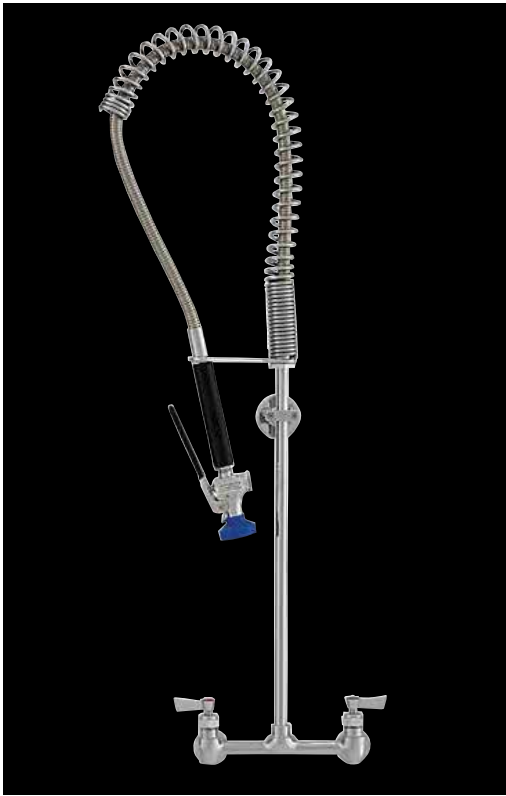

Changing wall- and backsplash- mount faucets and pre-rinse units is now easier with the Fisher EZ-Install Adapters. The adapters make it easy to replace old, tired fixtures with new Fisher plumbing products.

SIMPLE TO INSTALL. SIMPLE TO SELECT.

It's easy to replace any brand of faucet with a Fisher faucet. The EZ-Install Adapter enables an industry standard Fisher Control Body to connect to existing concentrics from any old commercial faucet by any other brand, such as T&S Brass, Krowne, Dormont, most imports, etc.

STANDARD IN ALL FISHER BRASS AND STAINLESS STEEL POP PACKAGED FAUCETS & PRE-RINSE UNITS.

QUESTIONS AND ANSWERS ABOUT BACKFLOW PREVENTION

Foodservice professionals are charged with the responsibility of providing proper backflow prevention when specifying Hose Reels, Hoses, Pot & Kettle Fillers and Pre-Rinse units. We have been asked many times to recommend the proper backflow prevention device to a particular application. The answer always has to be: "Check the local department in your area having jurisdiction regarding backflow prevention."

Please keep in mind that in all cases, approval of the type of device required, must rest with the local plumbing official and the local code which must be enforced. You should check with your local code agency having jurisdiction before specifying any plumbing device which may require backflow prevention.

Q WHAT IS BACKFLOW?

A. Backflow is the reversal of the normal flow of water in the plumbing system.

Q WHAT CAUSES BACKFLOW?

A. Backflow can be caused by Back-siphonage and/or Back pressure.

► **Back-Siphonage** is caused by a negative pressure in the supply line which causes reverse flow of water from the outlet.

► **Back Pressure** is a pressure higher at the downstream or outlet end of a water distribution system than at a point upstream.

Q WHAT IS CONTINUOUS PRESSURE?

A. This term applies to an installation in which the pressure is being supplied continuously to a backflow preventive device for periods of over 12 hours at a time.

NOTE: A vacuum breaker should never be subjected to continuous pressure unless it is of the continuous pressure type and clearly identified for this service.

Q WHAT IS THE DIFFERENCE BETWEEN POLLUTION AND CONTAMINATION?

A. Pollution of the water supply does not constitute an actual health hazard, although the quality of water is impaired with respect to taste, odor or utility. However, contamination of the water supply does constitute an actual health hazard. The consumer, subjected to potentially lethal water-borne disease or illness, is at risk.

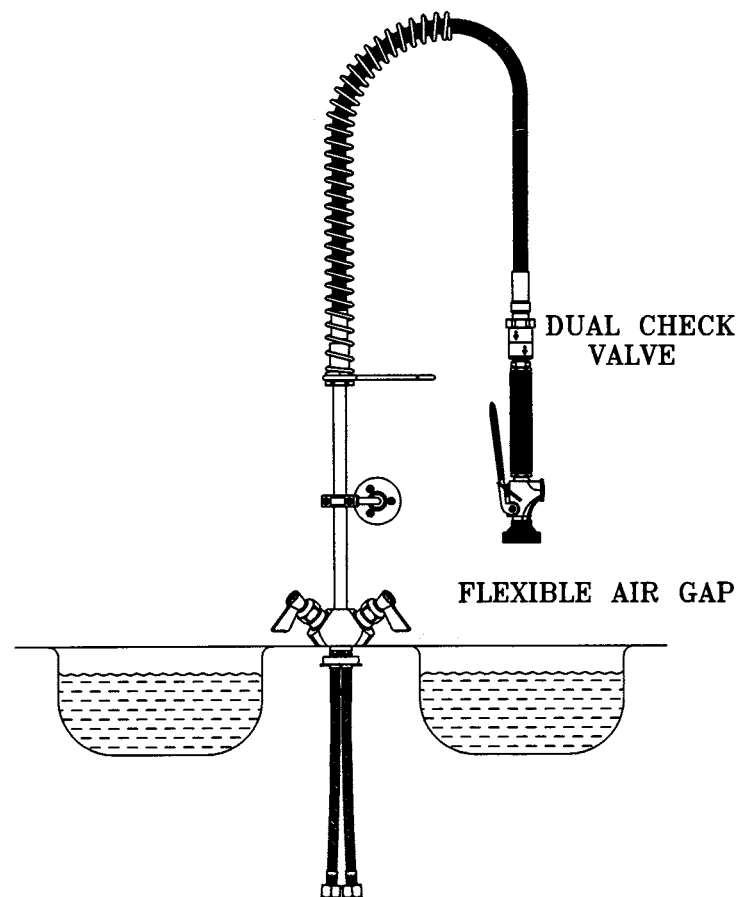

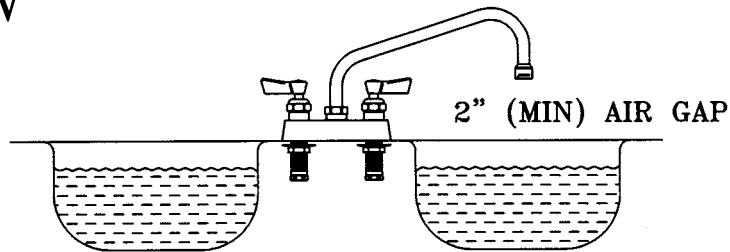

Q WHAT BACKFLOW PREVENTION METHODS ARE AVAILABLE?

A. The corresponding illustrations show four mechanical set up methods for backflow prevention. Each has a particular application of devices and plumbing products, which alone or in combination, will prevent most unintentional backflow of water caused by back-siphonage or back pressure.

➤ **AIR GAP** Air gap is a minimum physical separation between a potable water supply outlet and the overflow rim of any receiving vessel which may contain a pollutant or contaminant. This prevents any backflow by back-siphonage or back pressure.

➤ **BACK FLOW PREVENTER (BFP)** BFP is installed in the water line when a plumbing fixture set up may allow the potable water supply outlet valve to reach the overflow rim of the vessel, thereby preventing backflow by back-siphonage or back pressure.

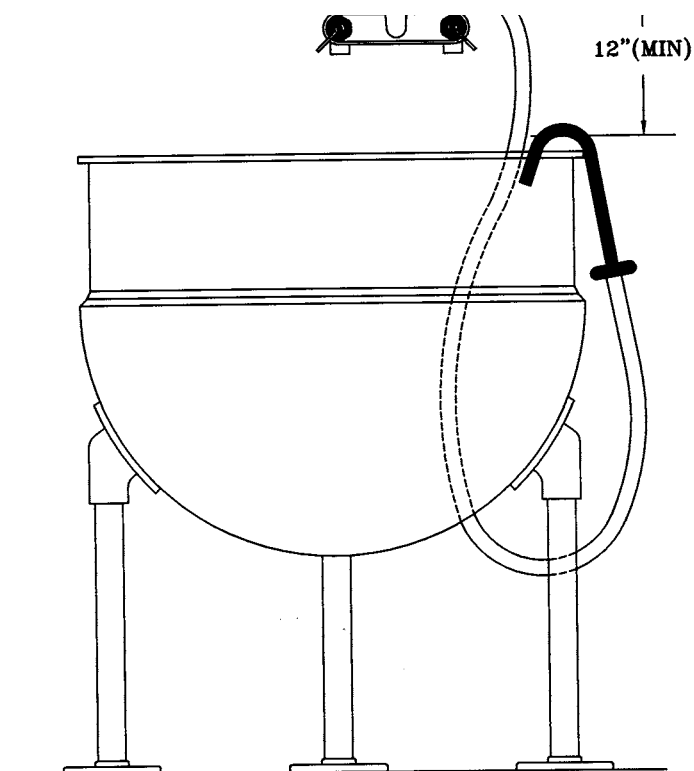

The BFP may be considered an acceptable means to protect against pollutants only. Check local codes for each particular installation and application.

➤ **ATMOSPHERIC VACUUM BREAKER (AVB)**

AVB can be installed to prevent both pollutants and contaminants **from back-siphonage only**. No valve installation is permitted downstream of the AVB. It may not be used under continuous pressure. The AVB outlet must be at a minimum height of 6" above the hose and discharge outlet point of use.

WARNING: Vacuum breakers must not be installed in a wall, above ceiling tiles, or where freezing or spillage will cause damage. Vacuum breakers should be installed in a location that is readily accessible for inspection.

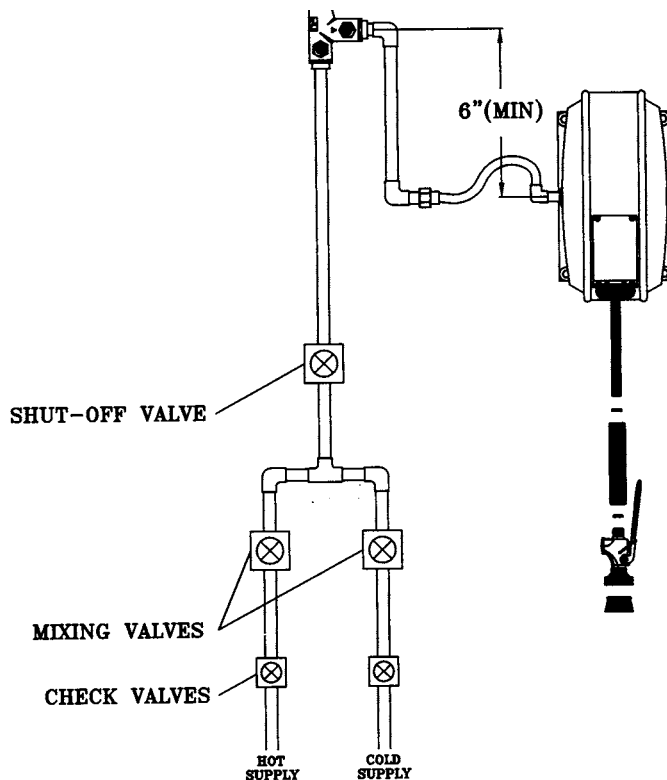

➤ **ANTI-SPILL PRESSURE VACUUM BREAKER (ASPVB)**

ASPVB can be installed to protect potable water supply against backflow from a nonpotable source due to negative supply pressure. Protection against backsiphonage only.

May be used in application of continuous pressure (shut off valves on inlet side). ASPVB must be installed at least 6" above the discharge outlet point of use.

WARNING: Vacuum breakers must not be installed in a wall, above ceiling tiles, or where freezing or spillage will cause damage. Vacuum breakers should be installed in a location that is readily accessible for inspection.

REEL RINSE UNITS

Fisher reel-rinse units make water conveniently available in all kitchen areas. Universally designed models are available for ceiling and wall mount use as well as under-counter models. All reel rinses are furnished ready to install and feature 3-ply, 200 lb. working pressure hoses. The hoses are designed to withstand 140°F continuous operating temperature. Simplify installation with Fisher's uniquely designed reel rinse control unit which combines all the necessary components into one complete system. Control valves and gauges are completely enclosed within a stainless steel cabinet with only three connections — giving the operator total, tamper resistant control. NOTE: In all cases, we suggest that local plumbing codes be followed, especially in the area of cross-flow and backflow prevention.

CAFE STYLE:

Available in open (white baked enamel finish) and closed (stainless steel cover) reel rinse styles with ratchet lock and easy tension adjustment. Furnished with 3/8" ID hose rated at 200 PSI, 140 degree water temperature. Water inlet is 1/2" Female NPT or 3/8" Female NPT.

INDUSTRIAL DUTY STYLE:

Available in open and closed reel rinse styles. Made of all stainless steel construction, with ratchet lock and easy tension adjustment. Furnished with either a 1/2" or 3/8" ID hose rated at 300 PSI, 140 degree water temperature. Water inlet is 1/2" Female or 3/8" Female NPT.

REEL RINSE CONTROL UNIT	
ITEM#	DESCRIPTION
1801	Reel rinse Control Unit

A uniquely designed Reel Rinse Control Unit that combines the necessary reel rinse installation components into one complete system. Valves, gauges and connections are completely enclosed within a stainless steel cabinet giving the operator total tamper-resistant control. Features include: Dual Check Backflow Pre-ventor, Water Hammer Silencer, 90 degree Panel Lock, Padlock Hasp and Finger Latch. Constructed for heavy-duty commercial use, it's easily installed by any plumbing professional. It includes an adjustable trim flange (not shown) for flush mounting. Its innovative, compact design provides complete control for any commercial reel rinse system. Inlets and outlets are 1/2" Female NPT.

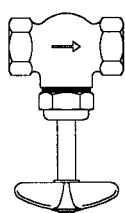

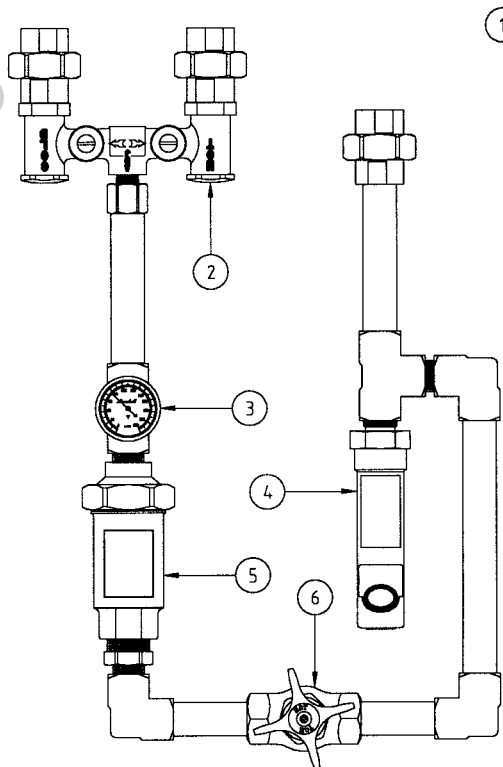

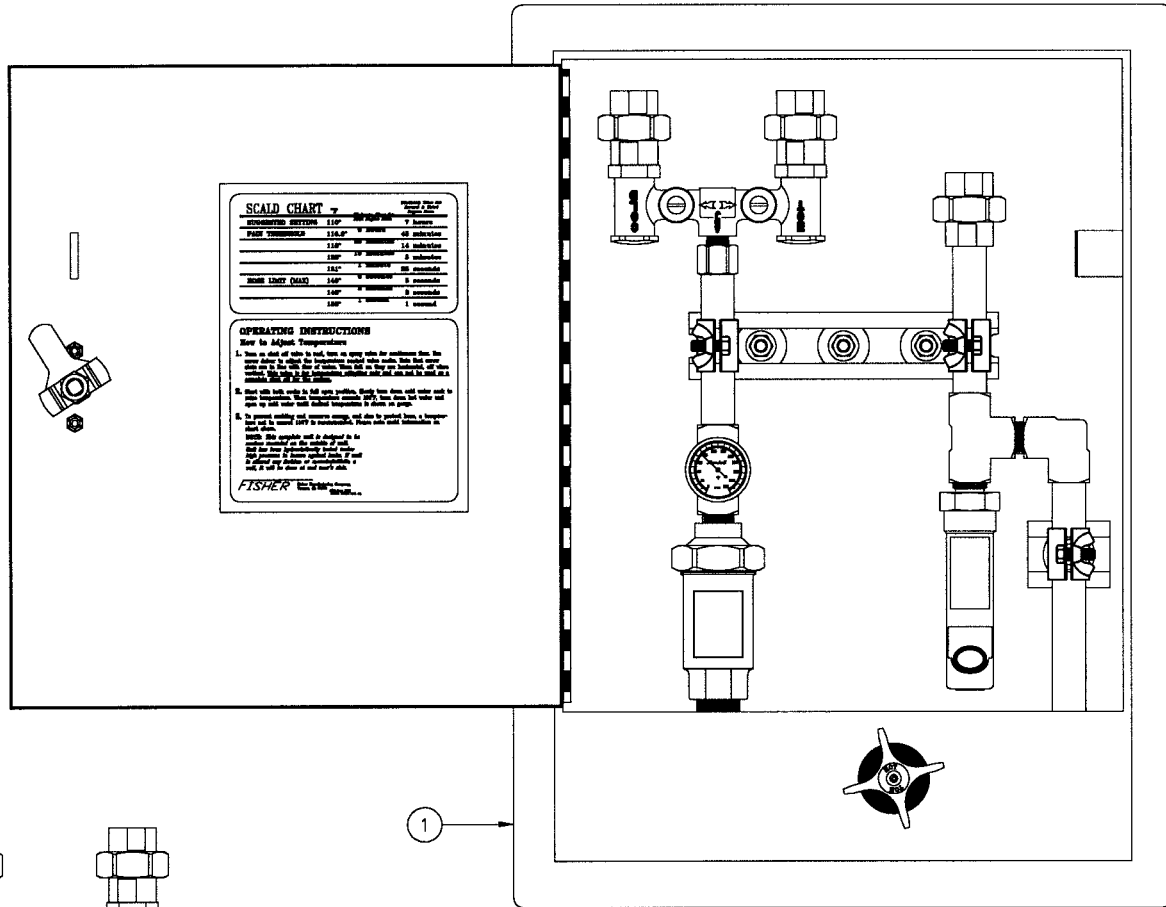

EXPOSED PIPING REEL RINSE INSTALLATION KIT	
ITEM#	DESCRIPTION
29475	Exposed Piping Reel Rinse Installation Kit

This kit is ideal for re-modeling and retro fitting Reel Rinse Units where the piping required for Reel Rinse Units is exposed on the wall. This kit consists of check valves, shut off and mixing valves and an Anti-Spill Pressure type Vacuum Breaker.

CONCEALED PIPING REEL RINSE INSTALLATION KIT	
ITEM#	DESCRIPTION
28266	Concealed Piping Reel Rinse Installation Kit

This kit is ideal for new construction where the piping required for Reel Rinse Units is concealed within the wall. This kit consists of check valves, shut off and mixing valves and an Anti-Spill Pressure type Vacuum Breaker.

FILL KING

BRASS- 14087 STAINLESS STEEL- 54267

The Fisher FillKing System. FillKing features a unique, single station design to deliver the ultimate in plumbing convenience and high volume kettle filling performance. It completes tough kitchen tasks quickly and easily...from filling high capacity vessels to washing down work areas.

DEPENDABLE WATER SERVICE ANYTIME, ANYWHERE.

Specifically designed for use in high-volume commissaries, schools, correctional institutions, B&I feeders and the military, the FillKing provides complete water accessibility and operator versatility in even the most hostile environments. Convenient supply lines allow water to be drawn from remote water source locations within the kitchen.

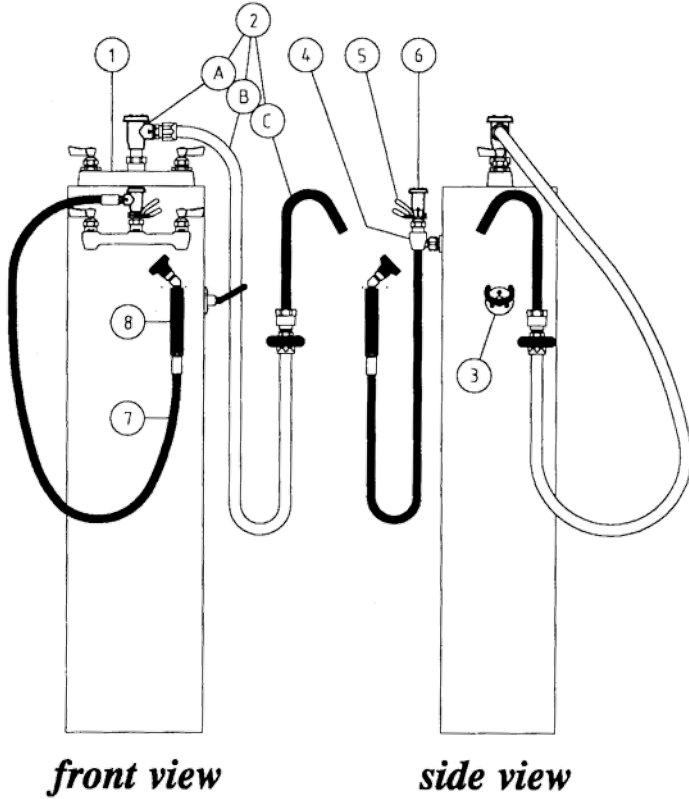

DURABLE, UNITIZED DESIGN.

The FillKing is a heavy-duty tower with a powerful Fisher 3/4" pot and kettle filler and 1/2" utility spray faucet plumbed into it. As a completely unitized fixture, the FillKing dramatically improves water service efficiency and eliminates the hazards involved in high-volume filling jobs. And with unmatched filling performance of 40 GPM, the FillKing increases productivity while reducing time, labor and plumbing equipment costs.

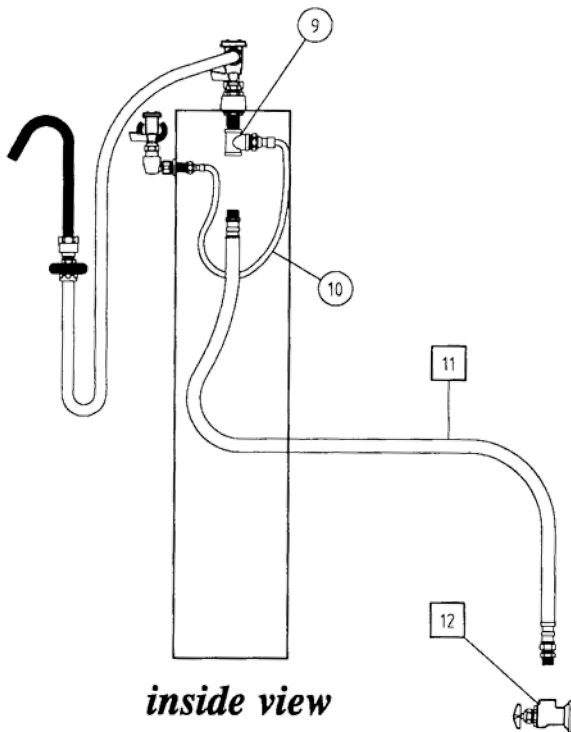

DESIGN BENEFITS...

- ▶ **Heavy-Duty, Stainless Steel Construction.**
- ▶ **Vandal-Resistant** — withstands hostile environments.
- ▶ **3/4" Rear-Connect Supply** — allows water connection from the wall, floor, UDS or ceiling.
- ▶ **Integral 3/4" Pot & Kettle Filler with 6" hose and 1/2" Utility Spray with 7' hose** for versatility.
- ▶ **Fully Plumbed** — includes built-in backflow prevention.
- ▶ **Four Point Tamperproof Mounting.** Radius corners for safety.
- ▶ **Unsurpassed filling speed of 40GPM — increases productivity; decreases time, labor and costs.**
- ▶ **Moves water service out front for convenience and safety.**

DRAIN KING™

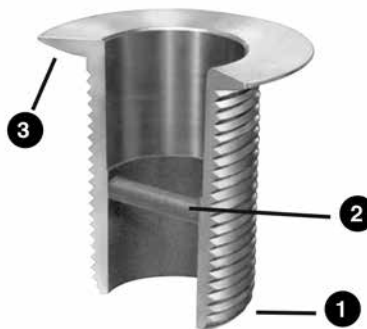

WASTE VALVES

The next generation of Rotary Waste Valves is here... the DrainKing by Fisher. The DrainKing features a revolutionary design engineered to withstand the harsh conditions and chemicals found in today's food-service operations. At the heart of the DrainKing is its Stainless Steel Ball Valve, held in a leak-proof socket and sealed by two Teflon seals.

The DrainKing's value approach to an increasing problem places durable stainless steel **ONLY WHERE IT'S NEEDED**, so you don't have the cost associated to where it's not!

Fisher Waste Valves have acquired an outstanding reputation over the years as the foremost in quality without equal. Check out these DrainKing features:

WASTE SOCKETS

- 1 Red Brass Construction — holds up against electrolysis, chemicals.
- 2 Cast-in Cross Member — filters large debris from going down drain.
- 3 Industry Standard Angle Taper — fits flush with bottom of stainless steel sink.
