Disposables

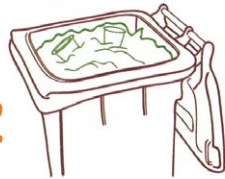

COMPOSTABLE PRODUCT LIFE CYCLE

Compostable products are made from plants

STEP 1

STEP 2

Binned with food waste and scraps after use

STEP 3

Taken by a compost collection service

STEP 4

Turns into compost

STEP 5

Helps grow new plants to turn into products

SUSTAINABILITY FACTS & TRENDS

“By using a complete suite of compostable food serviceware, not only can contamination be mitigated as consumers are able to **easily dispose of food and packaging together**, but compostable packaging can help **deliver maximum food scraps to compostables bins.**”

30%-50% diversion rate by recycling only

55%-65% diversion rate with recycling and BOH composting

>80% diversion rate with recycling, BOH composting and FOH composting with compostable products

Diversion Rate - Recyclable and compostable material diverted from the landfill compared to the total amount of waste material generated.

NOTE: Ask your DON Sales Representative for stocking locations

Snooze needed a product for their take-out pancake flights. A flatbread pizza clamshell with a couple of tweaks did the trick - pancakes stay fluffy and don't get soggy in transit. They also opted to custom print the top with their signature orange, adding further distinction to their packaging.

Custom Product Development

Go beyond simple customization. Fulfill your packaging and branding needs in ways custom printed items cannot with custom shapes from Eco-Products. Ask your DON Sales Representative how you can work with an experienced designer to help you create a tailor-made product to serve your food with flair without sacrificing functionality.

Regalia™ Serveware

Eco-Products

- Strong and reliable alternative to traditional plastic; resistant to cuts and grease
- With a sugarcane base and PLA Lid, Regalia offers a 100% compostable catering solution
